SUMMARY

Experience Backend Developer with over 3 years of hands-on experience in Java Spring Boot and cloud technologies. Adept at solving complex problems and effectively communicating solutions. Eager to bring my technical expertise and passion for innovation to a dynamic team, driving forward-thinking projects.

EXPERIENCE

09/2021 – 09/2024

HOME365 – RAMAT GAN

Backend Developer

- Contributed to platform enhancement by developing new features and maintaining codebase using Java and Spring Boot, Implemented RESTful APIs and optimized performance.
- Developed a robust backend service for seamless financial transactions. Implemented a data processing pipeline to extract, transform, and securely transfer transaction data to SFTP servers in a bank-compliant CSV format.
- Constructed a PDF generation service utilizing AWS S3 and Apache PdfBox. Dynamically populating custom templates with diverse content, including base64 encoded images, to create tailored PDF documents.
- Developed an onboarding application to convert customers into employees for a gig economy model. Implemented a robust multi-account system with distinct user interfaces for tenants and employees.
- Integrate with third-party services like Stripe, Hubspot, and SendBird.
